Professional Summary

AI Engineer with hands-on experience designing REST APIs, backend services, and scalable enterprise-oriented applications using Python, FastAPI, JavaScript, Node.js, Docker, AWS, and Google Cloud Platform (GCP). Skilled in API integrations, asynchronous workflows, WebSockets, cloud deployment, and modular backend architectures for data-driven applications and automation systems.

Experienced collaborating in Agile cross-functional environments with engineers, product teams, DevOps, and stakeholders. Strong problem-solving, technical communication, troubleshooting, adaptability, and documentation skills with focus on scalable, maintainable, and reliable backend solutions.

Education

Instituto Politécnico Nacional (IPN)

Mexico

Bachelor's Degree in Artificial Intelligence Engineering

Experience

AI / Machine Learning Engineer Intern

Feb 2026 – Apr 2026

Data AI – Remote, Mexico

- Designed and integrated backend services and REST APIs for AI-driven enterprise workflows and cloud-based applications.
- Developed scalable data processing and NLP pipelines using modular backend architectures focused on maintainability and extensibility.
- Collaborated with multidisciplinary teams using Agile methodologies, Git workflows, and technical documentation practices.
- Improved reliability, response quality, and latency through experimentation, debugging, workflow optimization, and cloud deployment practices.
- Documented technical workflows, system changes, and development progress updates across project phases.

Full Stack AI Developer (Freelance)

Mar 2025 – Jan 2026

Self-employed – Remote, Mexico

- Designed and developed REST APIs and backend systems using FastAPI, Python, JavaScript, Node.js, and Docker.
- Built scalable integration workflows connecting external APIs, AI services, and enterprise-style backend systems.
- Implemented asynchronous workflows, WebSocket communication, and modular microservice-oriented architectures.
- Developed data processing pipelines, automation systems, and multimodal applications integrating text and audio processing.
- Improved scalability and maintainability through backend optimization, containerization, and distributed workflow orchestration.

Technical Workshops

Build With AI Workshop – Google Mexico

May 2026

Hands-on Technical Workshop

- Built cloud-based AI systems integrating APIs, multimodal processing pipelines, and distributed backend services using Google Cloud Platform.
- Worked with real-time communication pipelines using WebSockets, FastAPI, Docker, Cloud Run, and service orchestration workflows.

- Developed retrieval systems, semantic search pipelines, and scalable backend architectures for enterprise workflows.
- Applied software engineering and security best practices including data protection, workflow reliability, and system monitoring.

Projects

Multimodal AI Assistant

- Built a production-oriented backend application integrating REST APIs, WebSockets, FastAPI, Docker, and cloud-based AI services.
- Designed modular architectures supporting text, image, and audio processing workflows with asynchronous streaming pipelines.

Enterprise RAG Agents

- Developed enterprise-style backend systems integrating vector databases, retrieval pipelines, REST APIs, and multi-agent orchestration workflows.
- Built monitoring dashboards, async workflows, and scalable integration pipelines using Docker and modular architectures.

Parallel Computing and Optimization

- Implemented multiprocessing workflows in Python to optimize machine learning experimentation and computational scalability.
- Analyzed performance, efficiency, and resource utilization across distributed processing pipelines.

Technical Skills

Programming: Python, JavaScript, SQL, Bash

Backend & APIs: REST APIs, FastAPI, WebSockets, Node.js, Express.js, JSON/XML, API Integration, Async Workflows, Microservice-oriented Architectures

Cloud & DevOps: AWS, Google Cloud Platform (GCP), Docker, Cloud Run, Linux, CI/CD, Containerization

Data & Integration: Data Pipelines, ETL Concepts, Workflow Automation, Semantic Search, Vector Search, Backend Integrations

AI & Systems: NLP, LLMs, Conversational AI, RAG, Embeddings, Multimodal AI, Distributed Systems

Frameworks & Tools: FastAPI, LangChain, Git, scikit-learn, TensorFlow, PyTorch

Professional Strengths: Cross-functional Collaboration, Agile/Scrum, Technical Documentation, Problem Solving, Troubleshooting, Analytical Thinking, Adaptability, Communication Skills, Continuous Improvement, Attention to Detail, Teamwork

Languages

Spanish (Native), English (Advanced – B2/C1), French (Intermediate – B1), Japanese (Basic – N4)
